

Résumé

Name: LIU Xin

Date of Birth: 31st May, 1985

Language: Mandarin Chinese, English

Mobile: +86 13917138267

E-mail: v2ex.livid@me.com

Technical Summary

Frontend Design & Coding

I worked with many web projects since 2001. I have knowledge and experience on every detail of web projects: from how to make web applications visually appealing for users, to how to market the web site in every stage.

I started my first iPhone related project in November 2007, currently I have done several iPhone web apps and native apps.

- CSS/XHTML web page design
- JavaScript
- iPhone web application design
- Illustration design, hand drawing or vector
- iPhone application design and Objective-C coding

Backend Coding & Systems

My earliest experience with Linux started in 1998 at my age of 13, I enjoy the feeling when after hours of hard work in hosting room, dozens different network devices got up and running. And I know how to make them working in a reliable and sustainable manner.

- PHP
- ColdFusion
- Java
- Python
- Perl
- MySQL
- SQLite
- Openfire
- Google App Engine
- Django
- Apache HTTPD
- Apache James
- Unix server administration: add/remove/build software, firewall, mail server, kernel configuration

Work Environment

I'm familiar with all major operating systems and following software used in work:

- Version control: Subversion, Bazaar, git

- Collaboration: [Basecamp](#), [Mantis](#)
- Coding: Xcode, TextMate, Eclipse, NetBeans
- Design: Photoshop

And I often use scripting languages like PHP or Python to automate various things.

I passed CET-6 exam when I was 18.

Work Experience

SHINRA-CORE - Founder - Since 07/2008

SHINRA-CORE is the name of my own studio. I can offer:

- iPhone application design, development
- Desktop application UI design
- Web site design
- Web application development at small or big scale
- Custom WordPress theme design
- Consultancy on user experience design, user interaction design, performance tuning

Currently my clients including:

- [Douban](#) - iPhone Web App and Native App

6.cn - CEO Assistant, Mac Team Leader, Project Manager - 05/2007 to 07/2008 (Beijing, China)

6.cn aka 6rooms, is video sharing site started in Mar 2006 by a team of veterans from [Sina](#), [Ceyuan Ventures](#) and [Goldman Sachs](#), it's growing very fast and now it's one of the largest video sharing sites in Asia according to [Alexa Traffic Rank](#) and various other sources. I was hired by CEO Mr. LIU Yan in May 2007 as his assistant, after I delivered a training on User Experience Design to 6rooms tech team.

- Help defining strategies in product and marketing
- Worked with Apple Inc. to launch the [iPhone edition of 6.cn](#)
- Coordinated the site-wide redesign project with a team consists 3 backend engineers, 2 frontend engineers, 1 ActionScript geek and 2 graphic designers
- Recruiting top designers and coders
- Providing in-house training on user experience
- Launched [footbig.com](#), a photo sharing site
- Awarded as the “**Indispensable Professional of 2007**” in 6rooms annual party

eBay - Software Engineer - 09/2005 to 04/2007 (Shanghai, China)

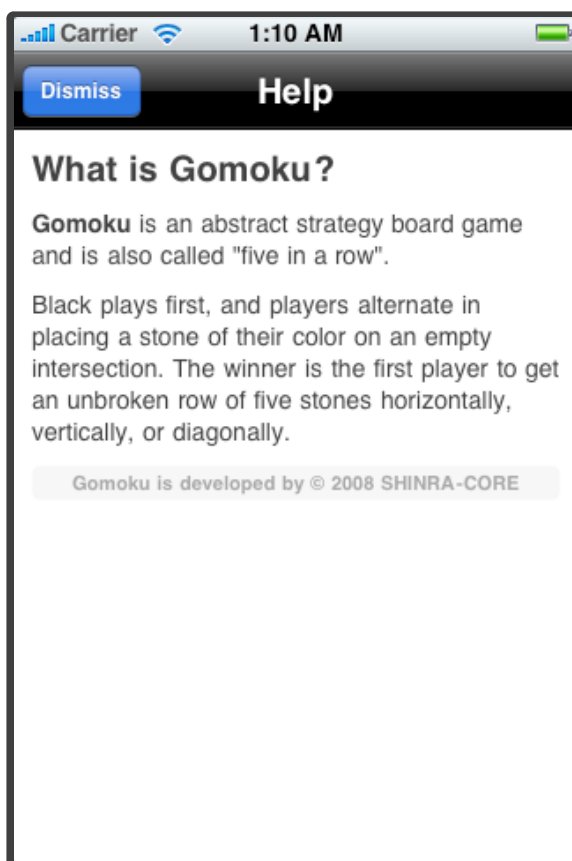

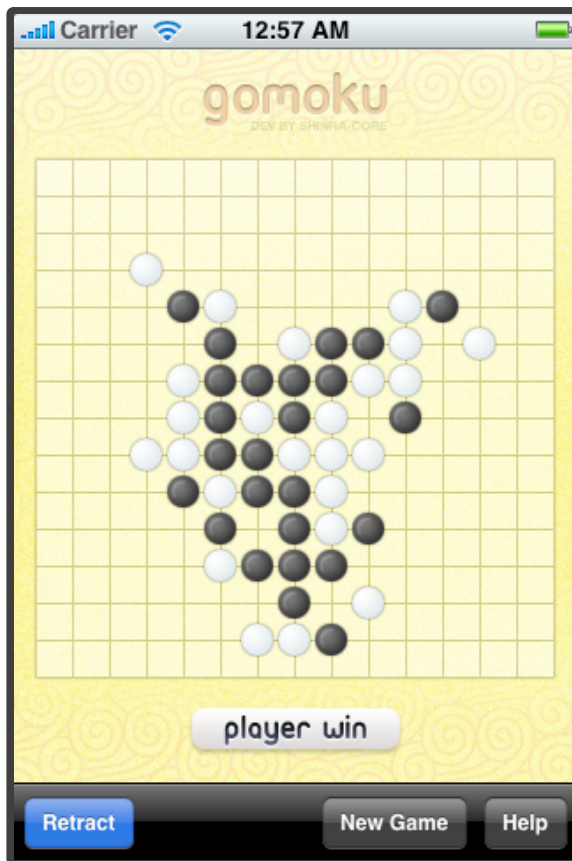

eBay started a new venture in the beginning of 2005, they launched [Kijiji](#) internationally in March 2005, and I was hired by the head of Kijiji China — [Mr. WANG Jian Shuo](#), as the first software engineer for [Kijiji China](#).

- Writing fundamental frameworks for other team members
- During the US-to-China migration of Kijiji China, worked with eBay China Operation Center to configure and tune a hosting room with 40+ network equipments including web servers, database servers, load balancers, UPS, writing scripts to automate various tasks including install/remove, monitor, performance optimizations
- Providing in-house training on PHP, JavaScript, Linux System Administration, Design, User Experience, Search Engine Optimizations
- Implemented a complete BBS for Kijiji China, from designing, coding to deploying
- Awarded as “**Best Trainer of 2006 Q3**” and “**Most Helpful of 2006 Q3**”

iPhone Native App Showcase

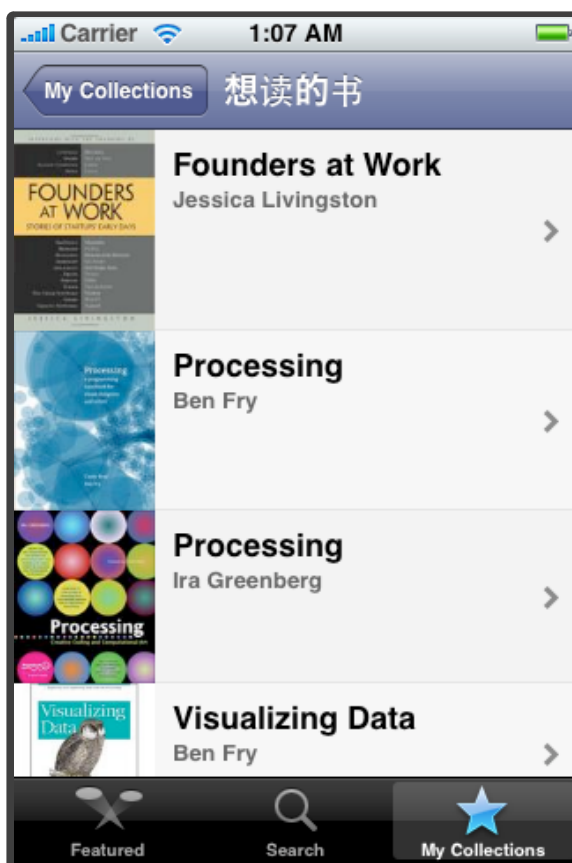

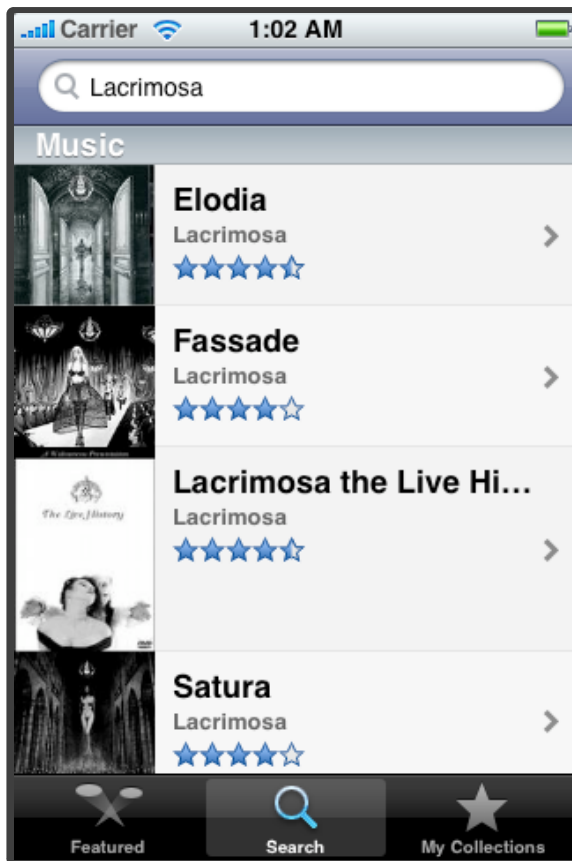

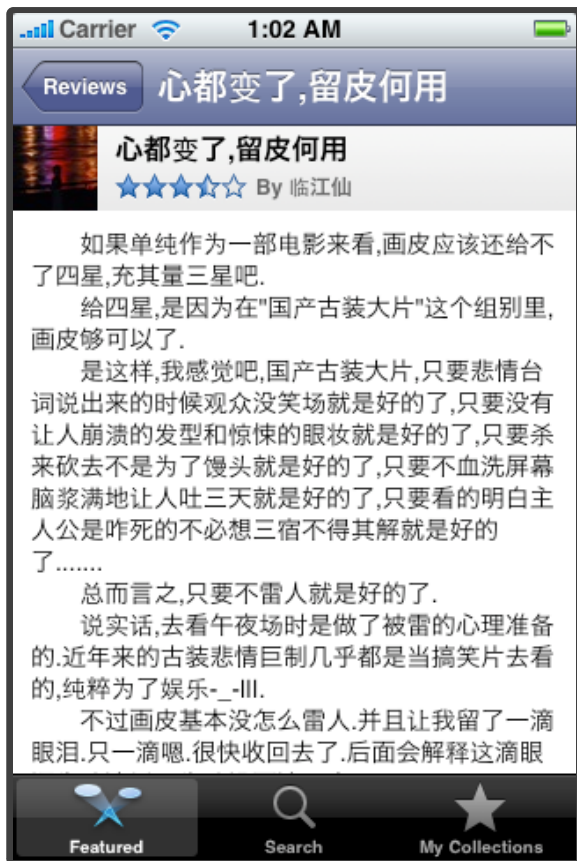

Gomoku

Gomoku aka Connect Five, is an abstract strategy game origins in China and developed in Japan. It took me two weeks to get this game working, including design, AI and coding. **I love coding games for iPhone.**

Douban

iPhone Web App Showcase

iPhone Edition of 6.cn

This web app is the first video related iPhone Web App in China, it's launched in November 2007. Several months after it's highlighted in [the official iPhone Web App directory](#), other local competitors like Tudou, Youku, Hupo.tv start to follow, some of them even just rip off my CSS and modify a bit to become their own.

iPhone Edition of Douban

Livid's Paranoid - 2008 - 矛盾盾 [show](#)

矛盾盾

可能在很多国内的互联网公司都存在这样的以己之矛攻己之盾的现象,公司里负责用户体验设计的团队一方面千方百计地设计新奇的舒适的用户体验,而另外一方面负责销售的团队却不停地提出各种扰民的所谓广告创意,在用户享用美好体验的同时去干扰这样的体验.于是就看到两个团队在不停地讨价还价,一方觉得广告的形式太恶心,而另外一方却又始终觉得广告不够多.而公司的管理层却因为收入方面的压力往往会站在销售团队一边.并且很多时候他们可能并不觉得他们自己做错了什么,因为他们觉得收入压力理所当然是第一要务,当然要首先解决收入问题.

这样的情况很让人难受,因为公司里面的每一个人都会觉得一切都让自己不满意.设计师会觉得自己的想法在被扭曲,销售团队会觉得这些设计师不食人间烟火,管理层会觉得员工没有团队意识?

而所谓的"收入压力"这样的玩意的来源是什么呢?

在我看来恐怕是因为这家公司的这项事业在开始之前没有想清楚自己究竟要的是什么.如果要的就是更多的钱,那么这个世界上比互联网更靠谱的赚钱手段也不是没有.如果要的是美好的用户体验,那么就应该忘记广告,让用户直接为了美好体验付钱.比如日本最大的视频网站ニコニコ不就是直接向用户收费的么?如果担心一下子从用户那里收不到太多钱,那么就不要把摊子铺那么大,大到最后钱也没有,用户体验更是什么都没有了.

在过去的一年算是见识到了相当多的莫名其妙的事情.

Introducing Gomoku for iPhone
Posted in [iPhone](#) on September 18th, 2008 by Xin

Gomoku is a very old game, it origins in China and developed in Japan. I started to port it to iPhone in August 2008 and finally got a working version in the beginning of September 2008. During the development, I also tried to purchase iPhone Developer Program from Apple China (because I'm living in China), as the game is getting more and more mature, I still cannot receive my iDP, this is a frustrated story I'll cover later.

However, then I decided to release the game for free via [Cydia](#), I just wish more people would enjoy the game sooner. So, add <http://apt.shinra-core.com/> to Cydia sources, and you'll find Gomoku under Games section. One more reason to jailbreak your iPhone / iPod touch, huh. :D

If you find any bugs, welcome to notify me via comments below and I'll fix.

Wikipedia has got more on this game: <http://en.wikipedia.org/wiki/Gomoku>

Gomoku has a professional variant called [Renju](#), it's the rule used by World Championship every 2 years. I do plan to support it. Hope you like the game. :)

SHINRA-CORE is the studio name for games and apps developed by me and my friends, I'll write more on it later.

p.s. There is another iPhone app provided in <http://apt.shinra-core.com/>, it's a client for a SNS site in China, still in early stage. Feel free to try if you can read Chinese.

[Cydia](#) [Games](#) [Gomoku](#) [iPhone](#)

about this site

V2EX is the personal blog of Xin Livid Liu.

Xin is a graphic designer, web developer and iPhone programmer based in Shanghai, China. He's running **SHINRA-CORE** studio committed to iPhone Games / Apps development.

上传改进 -- 在上传的时候选择相册

Posted by Livid on 2008-4-18 1:02:27 CST - 0 comments - 0 trackbacks

add to del.icio.us tags: enhancement

footbig 的照片上传功能又有增强了, 现在可以在上传的时候选择相册了。这样的话, 在照片上传完成之后, 就会自动放入到你选定的相册中。

另外就是, 现在在上传完成后的信息编辑页面上, 有了“继续上传新照片”的链接, 减少一些不必要的点击。

希望你喜欢这些小小的改进。

关于好友

Posted by Livid on 2008-3-9 3:17:25 CST - 1 comments - 0 trackbacks

add to del.icio.us tags: new-feature

从 footbig 上线的第一天, 就有“好友”这个功能了。而 footbig 作为一个专注于摄影乐趣的网站, “好友”这样的功能的意义究竟应该如何定义呢? 这篇文章将试着为你解答这个问题。

首先明确的是, footbig 上的好友是单向好友。“单向好友”这个词听起来有些费解, 意思是, 甲可以不用经过乙的确认, 就把乙放入到自己的好友名单, 而这个时候乙的好友名单上没有甲。乙会收到一个关于甲把自己加为好友的通知, 然后决定是不是也把甲放入自己的好友名单。

这样的设计是基于一个假设, 即来到 footbig 的每一个人, 当他上传了第一张照片之后, 他是希望有更多的人能够看到他的照片的。因此我们设计了好友功能, 当你把别人加为好友之后, 就可以在每次登录之后, “自动”地看到来自好友上传的最新照片。

所以, 其实你也可以把“加好友”理解为“开始对某人进行关注”, 当然, 这样的关注, 是基于友好和欣赏的出发点的, 这是我们努力提倡的社区氛围。

而一个问题我们无法回避, 就是, 如果我不希望某个特定的人关注我呢? 于是 footbig 的一个最新功能可以帮助你: 登录之后, 点击顶部的“好友”, 然后点击“谁把我加为好友”, 切换到“方格”视图 (如果你用的是“列表”视图的话), 然后你会在用户名字后面发现一个图标 。点击 这个图标将可以把自己从对方的好友列表中去掉, 也即是实现不希望被此人关注。这个操作将消除你和这个人之间的各种好友联系, 并且, 不会以任何方式通知对方, 一切都很隐秘。

关于 footbig 的阶段总结

Posted by Livid on 2008-2-17 5:31:08 CST - 10 comments - 0 trackbacks

add to del.icio.us tags: conclusion

footbig 项目开始于 2007 年 10 月。到目前为止已经 4 个月了。

目前 footbig 已经初步具有一个照片分享网站的感觉, 更重要的是, 我想明白了这个项目的意义和必要性所在。

首先, 照片和图片是不同的。所谓照片是指用数码相机拍摄或者用胶片相机拍摄冲洗扫描之后所获得的。照片是拍摄者观察和思考这个世界的一种方式, 通过拍照这一行为将其由最有必要保存的部分以视觉和回忆的方式记录下来, 因此照片是一种丰富的构成, 既包括视觉上的

Education

I dropped out of high school at my age of 17, for various reasons. One major reason is that I already knew what I'd love to do when I was 15, I made a list of things I'm going to do, the list contains every amazing things I can do with computers. So I dropped out just for more time I can have to explore the world.

University may be a great place, however, I didn't feel excited about it when I was 17, so it's just an arrangement of my time.

My high school days were spent in two high schools, both are the best in the city of Kunming. I entered No.3 Middle High School of Kunming with the 2nd highest score of entrance examination, after one year, I chose to transfer to Middle High School of Yunnan Normal University, just for some fresh new air. Because of the highest score, the transfer was a breeze.

I started an online community site after I entered the new high school, I can still remember it was launched on September 14th, 2001. It was a collection of code written in Perl, whole site is a bit like today's SNS, having many functions even some nonsense ones like you can virtually marry someone. Its name was *ePeta*, *e* for electronic just like *e* for eBay, and *Peta* is 10^{15} , yes it seems that all geeks have a crush on big numbers. All my schoolmates around registered, and all topics they were discussing, they even used the site for organizing calendar of student union and club activities. I still remember we had a very professional D&D club and several Starcraft teams.

Soon the site gained attentions from teachers. In Year 2001, most Chinese school teachers tend to be very serious, I guess they learned that from CCTV, and they assume we students share a same view of the world with them, however, soon they found we're talking about everything in ePeta, from what to do in weekends, to something they don't like to see, like stories making fun of teachers, playing hooky and sex.

They had several talks with me, they asked me and others to implement more strict moderation because there are too many “bad things”, then I argued, “it’s just like the world, it’s complete with bad and good things, you just can’t pretend that there are only good things. It’s everyone’s own responsibility to determine bad or good, for himself but not others”, and I became the bad boy can’t be saved in their views.

Several friends of mine, ones who were working together as administrators of ePeta, thought it’s too “dangerous” to continue working with me, so they turned hostile to me.

In the beginning of 2002, all those conflicts just get worse, because of some pornographic contents posted by members, and I didn’t care to delete because I thought it’s nothing, the school intimidated me into closing the site. The result is that I set a hidden flag on those contents, and the whole site got a face shift, its color scheme is turned to dark from bright orange.

During dark January 2002, I read a book titled *Les Confessions* written by Jean Jacques Rousseau, and I felt how distant it is between me and the old people in school. They believe in censorship, mind control, abstinency and repeating. And my conclusion of many things is “so what”.

ePeta was a quite memorable thing in many of my schoolmates, even in many ones of teenagers in city of Kunming. Conflicts, sentimental memories, tears and smiles, girls and boys, love and hate. When it’s shut down in August, 2003, it had 13000 registered members and millions of posts.

It was a pure project. Just for fun and ideas, just like my teenage time. In today’s view, a sustainable web site should find an organic business model to make it go further, but the first time I heard of the word “business model” is after my 20. So, maybe I should say, let it be.

In March 2003, I was 17, three months after I dropped out, the high school asked me to contend in a national science innovation contest on behalf of the school, they told my parents that the grand prize would mean opportunities from 1st class universities like Tsinghua. I happened to work on a hobby project at that time, so, for making my parents happy I was in. My hobby project is about mobile Internet, I think it’s possible to extend device function via mobile Internet, even with simple presentation layer like WML 1.0, there are a lot things can be done at the backend.

So I implemented an online community site with Microsoft technologies like server side COM components and SQL Server 2000, and WML 1.0 as the frontend. I won the grand prize, and it means +10 benefit in university entrance examination. There are so many students competing for university entrance examination nation wide, +1 means I can beat at least 4000 competitors, so +10 is a lot. But I still decided not to go to university.
